

MULTI SAMPLE SLITTER

Fast creation of standardized paper-strips for the paper test.

Test description :

The sample sheet is inserted into the guidance above the device. By pressing the foot-switch strips will be cut and stored below the cutter spindle. The knives and paper guidance are protected by a plexiglas cover against any touch.

An optional parallel calliper simplifies the exact adjustment of the slitting width.

Physical specifications

Dimensions

40 x 55 x 55 cm (WxDxH)

Net Weight

20 kg

Features

- Double sided cut of 7 paper strips from one style sheet at the same time
- Strip width is adjustable
standard: 6 strips 15 mm width
1 strip 50 mm width
- Strip length: up to 300 mm
- Hardened and tempered knives
- Long lived self-sharpening knives
- Grammage range: 40...300 g/m²
- Cutting accuracy: \pm 0,02 mm
- Controlled by foot switch
